[a] Not included in column 13.
[b] Pension fees for military and civilian personnel.

Notes:

1.1. Personnel
Excludes service pensions.

1.2.1. Materials for current use
This item comprises fuel, oil and lubricants, communal messing and procurement of replacement clothing, medicines and bandages.

1.2.3. Purchased services
(a) This item includes postage, cargo and transport costs, telecommunications charges and general clerical expenses.
(b) In accordance with the Federal Armed Forces accounting system, travel expenses are considered personnel costs and are included in items 1.1.1. through 1.1.3.

4. Total (1+2+3)
A breakdown of expenditures for United Nations peacekeeping by item is not available.

1. through 4. General remarks
Owing to rounding, components may not add up to totals.

Notes:

1. For technical reasons, budgetary figures are presented instead of actual expenditures.
2. Details may not add up to the totals, due to rounding off.
3. "Personnel" (row 1.1) includes food supplies for uniformed personnel.
4. For technical reasons, the expenditures for the United States forces stationed in Japan (FY 2009: 193 billion yen) are included in the figures presented under column 6 (Support) and 7 (Command).
5. Besides the above table, there is the cost for SACO (Special Action Committee on Okinawa)-related expenses (FY 2009: 11 billion yen) and US Forces realignment-related expenses (reduction of the burden of the local community) (FY 2009: 60 billion yen).
6. In accordance with the restructuring of the Ministry of Defence, the cost for security conferences has not been included in the above table since 2008.

Serbia

[Original: English]
[13 April 2010]

United Nations Standardized Instrument for Reporting Military Expenditures
(Actual outlays, current prices)

Country: Republic of Serbia **Fiscal year**: 2009

National currency and unit of measure: thousands of Serbian dinars (RSD)

(The unit of measure should not exceed one ten thousandth of the total military expenditures.)

Information on expenditures for defence for 2009

1. Funds amounting to 65,663.7 million RSD were allocated for the purpose of defence financing for 2009. This amount also included resources for the supplementary financing of military pensions (22,923.2 million RSD). The earmarked funds exceeded the funds allocated for 2008 (66,403.9 million RSD) by 1.12 per cent.

2. In 2009, the sum of 65,627.8 million RSD was spent for defence, which amounts to 99.9 per cent of the total earmarked resources. The resources for defence financing were allocated as follows:

- military expenditures 41,741.4 million RSD (63.6 per cent)
- civil defence 963.3 million RSD (1.5 per cent)
- military pensions (supplementary financing) 22,932.2 million RSD (34.9 per cent)

3. The resources for military expenditures were spent as follows:

(a) Operational costs: 36,867.4 million RSD (88.3 per cent), including 23,433.2 million RSD for salaries and reimbursements for the employees of the Serbian Armed Forces and the Ministry of Defence and 13,434.3 million RSD for regular maintenance, which includes logistics, training and other tasks in the field of regular activities;

(b) Procurement and construction: 4,808.3 million RSD (11.5 per cent), including 3,352.7 million RSD for armaments and military equipment and 1,455.6 million RSD for construction and maintenance of military facilities;

(c) Research and development: 65.7 million RSD (0.2 per cent).

4. The largest portion of the resources is appropriated for regular activities and salaries (79.0 per cent), which significantly limits the resources for armaments and military equipment, the construction of military facilities and flats and research and development. The procurement of more modern and more complex technical systems is impossible, and available resources are limited to general overhaul and minor technical upgrades and the procurement of ammunition and movables for general purposes. As a result, the Serbian Armed Forces inevitably lags behind neighbouring countries, in technical terms. There is a similar situation in the military construction field, where the funds were used for construction, the purchase

of buildings and facilities, and capital maintenance. It was a priority to spend funds on better working conditions for employees; housing, however, was neglected, owing to insufficient resources. The impossibility of resolving the housing issues of the Serbian Armed Forces and the Ministry of Defence within the earmarked budget has been a significant problem for years. The Government therefore adopted a master plan to ensure resources by selling surplus real estate and movables, to be used for financing the reform of the Ministry and the purchase of flats for members of the Serbian Armed Forces and the Ministry of Defence.

5. In 2009, the expenditures for the procurement of equipment and for the general overhaul and upgrading of armaments and military equipment amounted to 3,352.7 million Serbian dinars, exceeding the 2008 amount by 4,394.9 million or 131.1 per cent.

6. A modest 0.2 per cent of the total amount spent on military expenditures was used for research and development, which is below the real need.

Annex

Views received from Governments in accordance with paragraph 6 (b) of General Assembly resolution 64/22

Colombia

[Original: Spanish]
[11 June 2010]

Introduction

1. Colombia wishes to state that, in its internal budget process, the Ministry of Defence and the National Planning Department are responsible for drawing up the defence and security budget and have determined that, given the institutional and historical characteristics of Colombia, that budget should include the expenditures for operating the National Police and the Administrative Department for Security.

2. As a result, a document entitled "*Metodología para el cálculo del Gasto en Defensa y Seguridad*"[1] was issued. This document establishes the rules and criteria for calculating the official figures for the defence and security budget according to the following principles:

- Identification of the expenditures financed with resources from the general budget
- Avoidance of double counting of expenditures
- Inclusion of expenses incurred by entities with assignments or functions that relate directly to defence or security.

3. Those who drew up the document took into account the international systems of military expenditures used by the United Nations, the North Atlantic Treaty Organization and the Stockholm International Peace Search Institute. Their purpose was to identify the differing calculation methods applied by these organizations. The review enabled them to establish in particular that the United Nations Standardized Instrument for Reporting Military Expenditures covers forces or entities responsible for internal security, in accordance with the guidelines issued by the United Nations Department for Disarmament Affairs under the term "Paramilitary forces". This term gives the following definition:

> The term "paramilitary" can apply to a variety of forces. Such forces may be intended to guard the national frontiers, mainly against such activities as illegal migration, smuggling or guerrilla infiltration. In other cases, their chief mission is the maintenance of internal security.

4. One aim of the Colombian methodology used to calculate expenditures on defence and security is to ensure coherence and consistency between the official figures published. To this end, the Ministry of Defence and the National Planning Department establish that the defence and security expenditure figures reported to

[1] The document can be downloaded from the website of the National Planning Department of Colombia at http://www.dnp.gov.co/PortalWeb/Portals/O/archivos/documentos/DJS/DJS_Documents_Publicaciones/metodologia_mayo_09.pdf.

national or international organizations are prepared according to the same criteria, that is, they include expenses for the National Police and the Administrative Department for Security. The report to the United Nations, in particular, conforms to the criteria defined for processing the respective form.

Recommendations

5. In the light of the foregoing, Colombia recommends that the United Nations Standardized Instrument for Reporting Military Expenditures should be enhanced through the inclusion of a section covering those countries that report internal security expenditures in terms of their own institutional and budgetary organization, with any necessary clarifications. In addition, the annual report which the Secretary-General submits pursuant to the General Assembly resolution entitled "Objective information on military matters including transparency of military expenditures" (see General Assembly resolution 64/22) should carry an analysis of this matter.[2]

6. In recent years a number of countries have reported expenditures under the column "Paramilitary forces" in that report, as the following table shows:

Countries that have reported internal security expenditures in United Nations reports on military expenditures, 2007-2009

2007	*2008*	*2009*
Belarus	Belarus	Belarus
France[a]	Colombia	Colombia
Finland	Finland	Lithuania
Guatemala	Lithuania	Poland
Lithuania	Mauritius	Portugal
Portugal	Portugal	Russian Federation
Russian Federation	Russian Federation	United States[b]
United States[b]	United States[b]	

Source: "Información objetiva sobre cuestiones militares, incluida la transparencia de los gastos militares" Baboro: Ministry of Defence-National Planning Department-Monitoring Group.

[a] France included expenditures on internal security forces until 2007. It no longer does so because from 2009 onwards the "Gendarmerie" was shifted from the Ministry of Defence to the Ministry of Internal Affairs.

[b] The United States has been reporting Department of Homeland Security expenditures since 2002 but under columns 12 and 14 of the United Nations form, not under the column headed "Paramilitary forces".

[2] This issue is of growing relevance given the trend towards considering as part of the defence and national security system the activities undertaken to prevent and counteract transnational crime (global drug problem, illicit arms trafficking, laundering of assets, etc.). In many instances, these matters are dealt with by the police or other internal security bodies.

Accordingly, Colombia believes it fitting to seek ways of improving the continuity of reporting by Member States, since a number of them, including Colombia prior to 2008, discontinued reporting for several years and do not have consecutive data available.

7. Colombia also suggests to the Secretary-General that an analytical exercise be developed to create and clean up indicators for comparing the military expenditures of Member States, with a view to increasing the scope of the Standardized Instrument and of his report on the same subject. Thus far, Member States compile figures but do not raise the difficulties inherent in drawing comparisons between States owing to such variables as: the institutional and budgetary structure peculiar to each country; the different national currencies; and defence policy objectives that change over time.

It is important to maintain an official channel with States for the receipt of this type of information, with a view to avoiding the spread of data calculated by third parties using different criteria — data that are not officially endorsed by the States concerned.
